## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Noji (JP 09-322371).

Regarding claim 1, Noji (abstract) discloses a cable box characterized in that rectangular metallic radiating plates 7, dimensioned and shaped so as to touch a transversal inner surface of a foursquare metallic pipe, are transversely arranged inside the foursquare metallic pipe 2 to divide the inner space of the metallic pipe 2 and house foursquare synthetic resin-made tubes A, B, C piled one on another within thus divided compartments (figure 6) in order to place the radiating plates at the bottom of the synthetic resin-made tubes to house power cables, wherein the metallic radiating plates and the foursquare metallic pipe are connected together to form an integral construction at the inner surface of the foursquare metallic pipe.

Regarding claim 2, Noji (abstract) discloses a cable box characterized in that rectangular metallic radiating plates 7, dimensioned and shaped so as to touch a transversal inner surface of a foursquare metallic pipe, are transversely arranged inside the foursquare metallic pipe 2 while partition plates (figure 6) are longitudinally arranged, monolithically forming the radiating plates 7, the metallic pipe 2 and partition plates (figure 6) at touching ends to divide the inner space of

Art Unit: 2831

the metallic pipe 2 into compartments and house foursquare synthetic resin-made tubes A, B, C piled one on another within thus divided compartments, thereby placing the radiating plates 7 at the bottom of the synthetic resin-made tubes A, B, C to house power cables (figure 1), wherein the metallic radiating plates and the foursquare metallic pipe are connected together to form an integral construction at the inner surface of the foursquare metallic pipe.

### *Response to Arguments*

3. Applicant's arguments filed 14 March 2005 have been fully considered but they are not persuasive.

Regarding Applicant's argument that the rectangular metallic partition and foursquare metallic pipe disclosed in Noji (JP 9-322371) are not connected together to form an integral construction, Examiner disagrees. Figures 1-5 show that the apparatus is an integral construction held together through frictional engagement. Therefore, the rejection is maintained.

### *Conclusion*

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2831

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
